

EUROBLAST SELECT 300

HEIGHT ADJUSTABLE BLAST MACHINE

Guyson's Euroblast Select - Height Adjustable Blast Machines, available in suction or pressure feed variants, are ergonomically engineered for multi-operator workshops.

Designed to seamlessly combine operator comfort with efficiency, the Euroblast Select features powered height adjustment at all four corners.

The latest design enhances operator height flexibility even further, as the armhole centre line and viewing window can be raised by up to 300 mm, twice the range of the previous model, while also achieving a lower minimum height than earlier designs.

Options can include:

- Model 400 or 900 gun (SF) or both
- Pressure pot and pressure feed nozzle
- Armrests fitted to enlarged armholes
- Media catch tray below cabinet side door
- Beige rubber lining of cabinet
- Secondary perforated steel lower floor
- Blast gun air pressure regulator and gauge (with lockable cover)
- Airwash pressure regulator and gauge (with lockable cover)
- Electrically timed door interlocks
- Control panel
- Earth bonding
- Fixed turntable - (painted or polyurethane coating option)
- Model 75/16 Cyclone Reclamator (free standing or un/motorised)
- Variety of dust collectors
