

Formula GP

General Purpose Ultrasonic Cleaner

Designed for hard surfaces, Formula GP is a fully water rinseable, low-alkaline cleaner, engineered to cavitate and de-gas efficiently. Formula GP is safer to use than caustic materials.

Formula GP is suitable for use on aluminium, and is ideal for removing contaminants from plastics, glass, metals and other materials, as well as removing brake dust.

Concentration

Dilute with water to give a 2 - 20% solution concentration before use.

TEMPERATURE

Ambient - elevated temperatures will reduce process time (recommended 40°C - 70°C).

pH Level

11.5

QUANTITY

- 1 Litre
- 10 Litre box (10 x 1 Litre)
- 25 Litre

Applications

- Used in a wide range of applications, including healthcare, manufacturing and processing industries
- Removes heavy contaminants and brake dust from components during remanufacturing operations
- Removes contaminants from plastics, glass, metals and similar materials
- Removes sap and residue from steel and aluminium wood cutting tools and saw blades
- Removes carbonised deposits from aluminium components
