

Formula PB

Polisher Brightener Ultrasonic Cleaner

Designed for the polishing treatment of metal surface components, this liquid acid product is engineered to cavitate and de-gas efficiently.

Formula PB is fully water rinseable, and serves as a preconditioning agent and anti-rust treatment for aluminium, steel and stainless steel.

Concentration

Dilute with water to give a 5 - 20% solution concentration before use.

TEMPERATURE

Ambient - elevated temperatures will reduce process time (recommended 70°C max).

pH Level

1 - 1.5

QUANTITY

- 1 Litre
- 10 Litre box (10 x 1 Litre)

Applications

- Removes oxides, shop soils, flux, and welding spatter from aluminium, steel and stainless steel
- Descales limescale
- Preconditions aluminium, steel and stainless steel
- Anti-rust treatment for aluminium, steel and stainless steel
- Light rust removal
